PRE-APPEAL BRIEF

Mail Stop AF
 Commissioner for Patents
 P.O. Box 1450
 Alexandria, VA 22313-1450

Sir:

In accordance with the Pre-Appeal Brief Conference Pilot Program, the applicant submits this pre-appeal brief accompanying the Pre-Appeal Brief Request for Review. Please consider the following.

I. Status of the Claims

Currently, claims 1-34 are pending in this re-issue application. *See Applicant's Response*, March 20, 2006, pp. 2-10. Claims 16-34 stand rejected and form the subject of this pre-appeal brief.

By way of background, this re-issue application was filed on July 10, 2003 with claims 1-30. In the non-final Office action mailed on May 9, 2005, claims 16-34 were rejected under 35 U.S.C. § 103(a) as unpatentable over Osako et al. (5,678,813) in view of one or both of Meier (5,280,895) and Harris, Jr. et al. (5,114,128). The applicant filed a response to the non-final Office action on October 11, 2005, amending claims 26-28, 30, and 31 to clarify the scope of protection sought and traversing the rejections.

The examiner issued a final Office action on December 19, 2005, maintaining the rejections of claims 16-34 under 35 U.S.C. § 103(a) as unpatentable over Osako et al. (5,678,813) in view of one or both of Meier (5,280,895) and Harris, Jr. et al. (5,114,128). The applicant filed a response to the final Office action on March 20, 2006, traversing the rejections.

The examiner issued an advisory action on April 7, 2006, maintaining the previous rejections of claims 16-34. Accordingly, claims 16-34 stand rejected under 35 U.S.C. § 103(a) forming the subject of this pre-appeal brief.

II. Issues on Appeal

The issues on appeal are whether one of ordinary skill in the art would have been motivated at the time of the invention to combine the teachings of Osako et al. and Meier to arrive at the claimed invention.

III. Argument

The applicant respectfully submits that one of ordinary skill in the art at the time of the invention would not have been motivated to combine the references suggested by the examiner.

The applicant respectfully submits that the examiner incorrectly contends that one of ordinary skill in the art would have been motivated at the time of the invention to combine the teachings of Osako et al. and Meier. Specifically, the examiner contends that one of ordinary skill in the art would have modified the Osako et al. system to use a controller disclosed by Meier to select one of a plurality of feeders at a time for the purpose of determining a degree of filling of a packer box and for controlling supply speeds of a feeder system accordingly. *See Final Office Action*, page 3, lines 6-10.

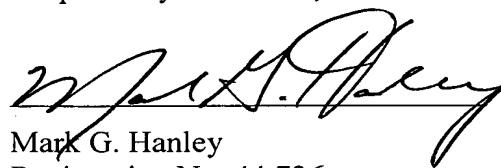

The applicant respectfully submits that modifying Osako et al. as suggested would serve no useful purpose and adding the Meier controller would create unnecessary overhead to the Osako et al. system. *See Applicant's Response*, March 20, 2006, page 11, line 20 through page 12, line 8. Specifically, the Meier system produces printed products having different numbers of signatures and uses a controller to selectively feed individually supplied printed products for selected product groups. *See Id.* In contrast, the Osako et al. system makes a mass of identical books by feeding a signature unconditionally from every feeder in the binding line system and, thus, has no use for the Meier controller because the Osako et al. system does not selectively feed. *See Id.*

The examiner also alleges that one of ordinary skill in the art would have been motivated to combine the teachings of Osako et al. and Meier to make a more efficient and less costly system. *See Final Office Action*, page 5, lines 11-13. The applicant respectfully submits that the examiner has made a mere assertion that is neither capable of instant and unquestionable demonstration nor well known and, thus, does not satisfy the requirements of taking "official notice." *See Applicant's response*, March 20, 2006, page 12, line 19 through page 13, line 10. On the contrary, the applicant respectfully submits that other, more practical solutions exist to address efficiency and cost related to determining a degree of filling of a packer box and for controlling supply speeds of a feeder system. *See Id.*, page 13, line 11 through page 15, line 2. Modifying the Osako et al. system as suggested by the examiner would result in a less efficient (e.g., more expensive) system that would essentially provide the same output without the Meier controller. *See Id.*, page 15, lines 3-10.

The applicant respectfully submits that one of ordinary skill in the art at the time of the invention would not have been motivated to modify Osako et al. in view of Meier because Osako et al. teach a system that operates on a different principle from the Meier system and the suggested modification is not necessary for the Osako et al. system. In addition, such a modification would make the Osako et al. system less efficient because it would incorporate an added cost for an unnecessary, unused function.

In view of the foregoing, the applicant respectfully submits that the examiner has improperly rejected claims 16-34. Accordingly, the applicant respectfully requests withdrawal of the rejections under 35 U.S.C. § 103 and respectfully submits that independent claims 16, 21, 27, and 31 and all claims dependent thereon are in condition for allowance.

Respectfully submitted,

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.
